

Peer Review

Evaluation · 'Olakunle Olayinka' created this peer evaluation on May 13, 2022 in course 'COM6103 Team Software Project (SPRING 2021~22)' ·

Start date · May 13, 2022 10:03 AM

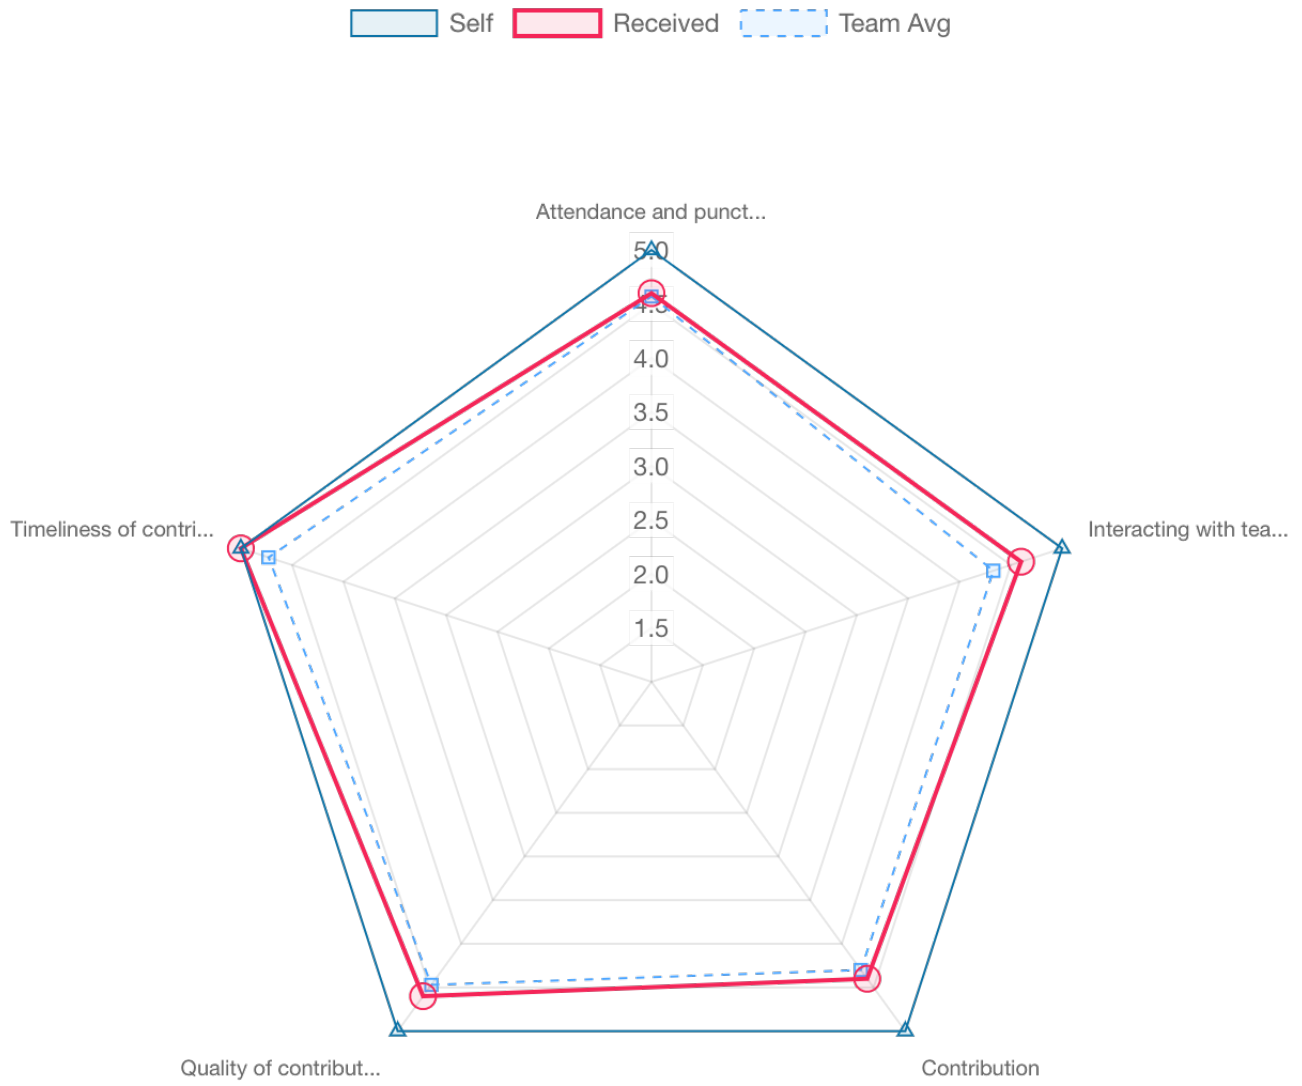

End date · May 23, 2022 10:03 PM

Pramod Raghunath Potdar

Here are your results from the peer evaluation 'Peer Review'.

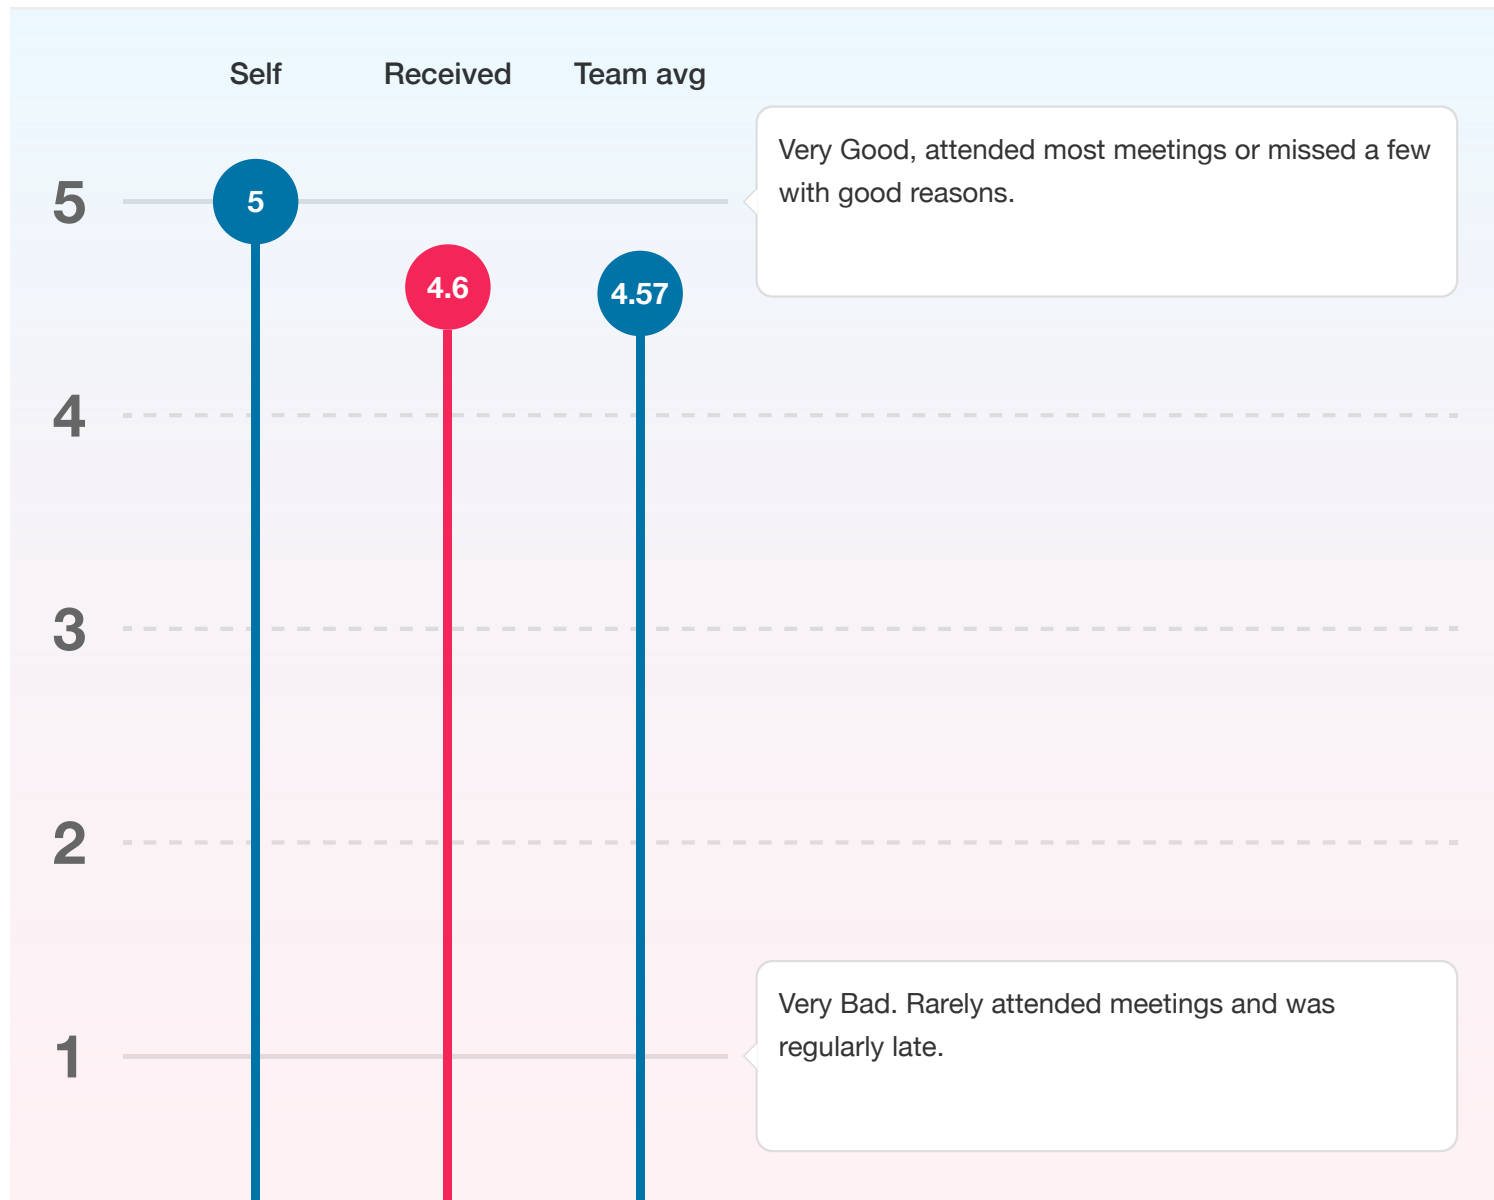

Peer questions

The results of the peer questions are displayed in three ways: how you rated yourself (Self), how your teammates rated you (Received), and finally what the average rating is of the entire team (Team Avg).

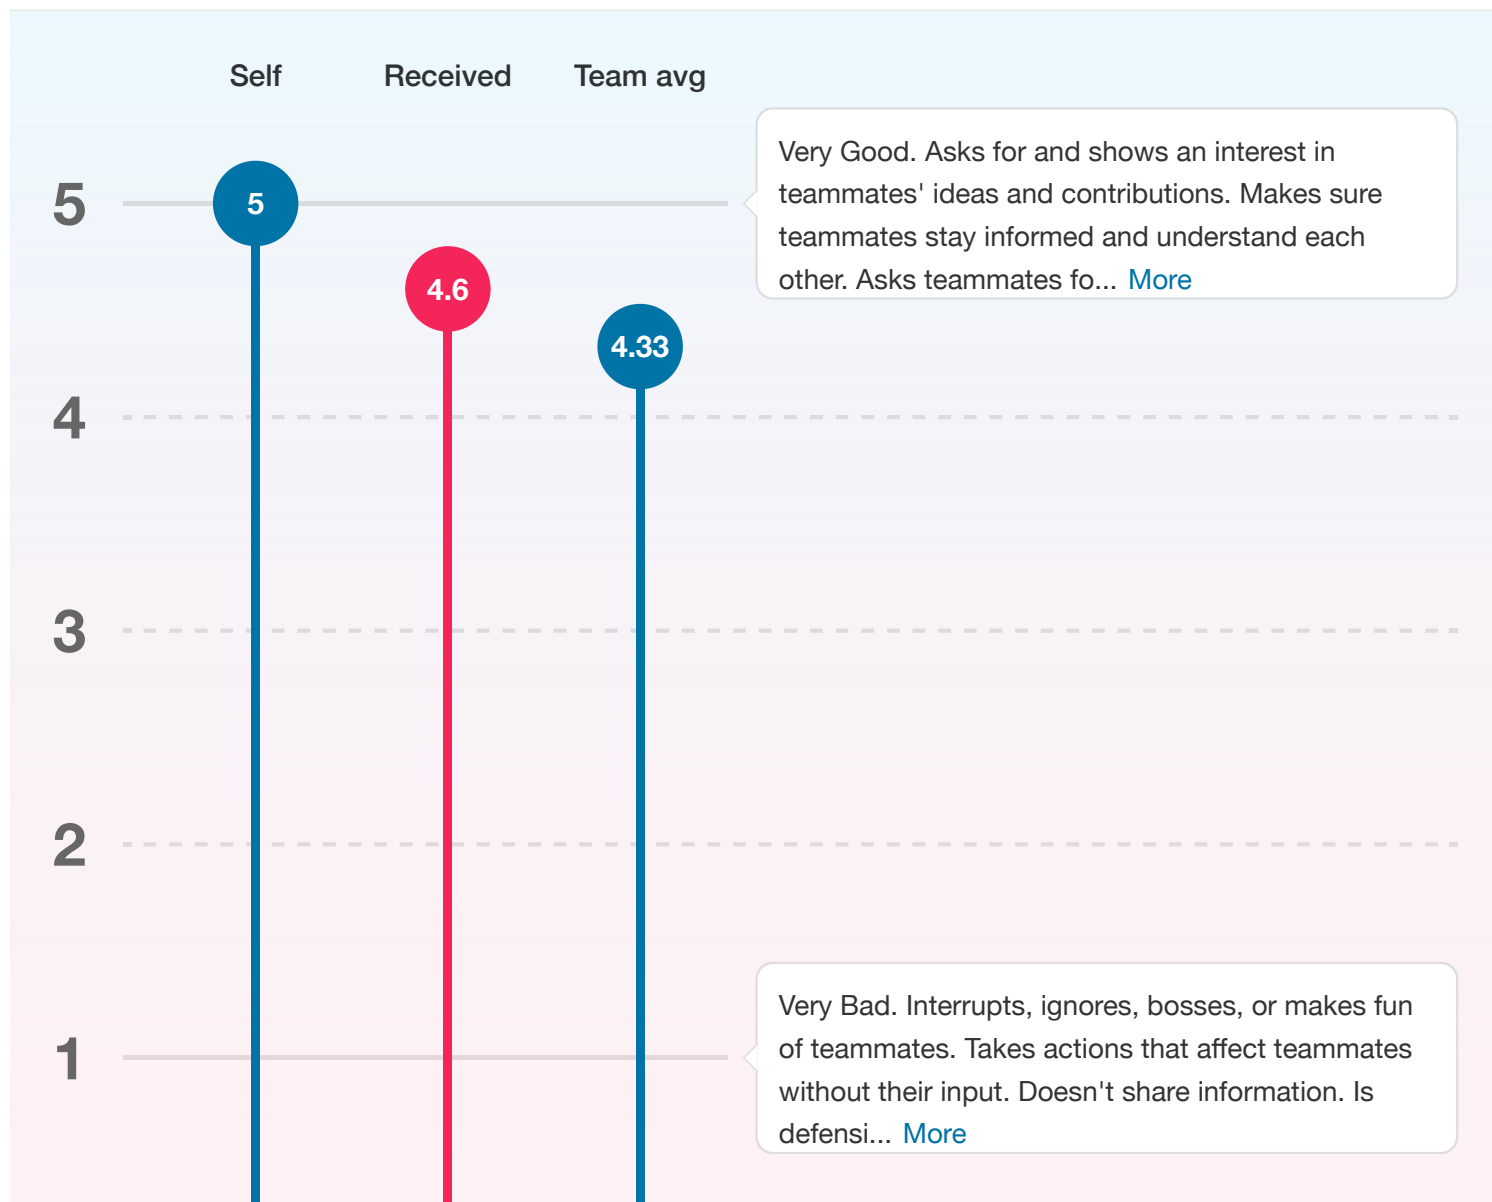

Attendance and punctuality

You should consider all forms of meetings that you arranged as a team. These may have been meetings with your team or advisor, as well as those where you met as a whole or part of a team to complete work.

Ability to work effectively with other team members

You should consider the interactions that your team member has had with the rest of the team. These may have been in person or via channels such as email.

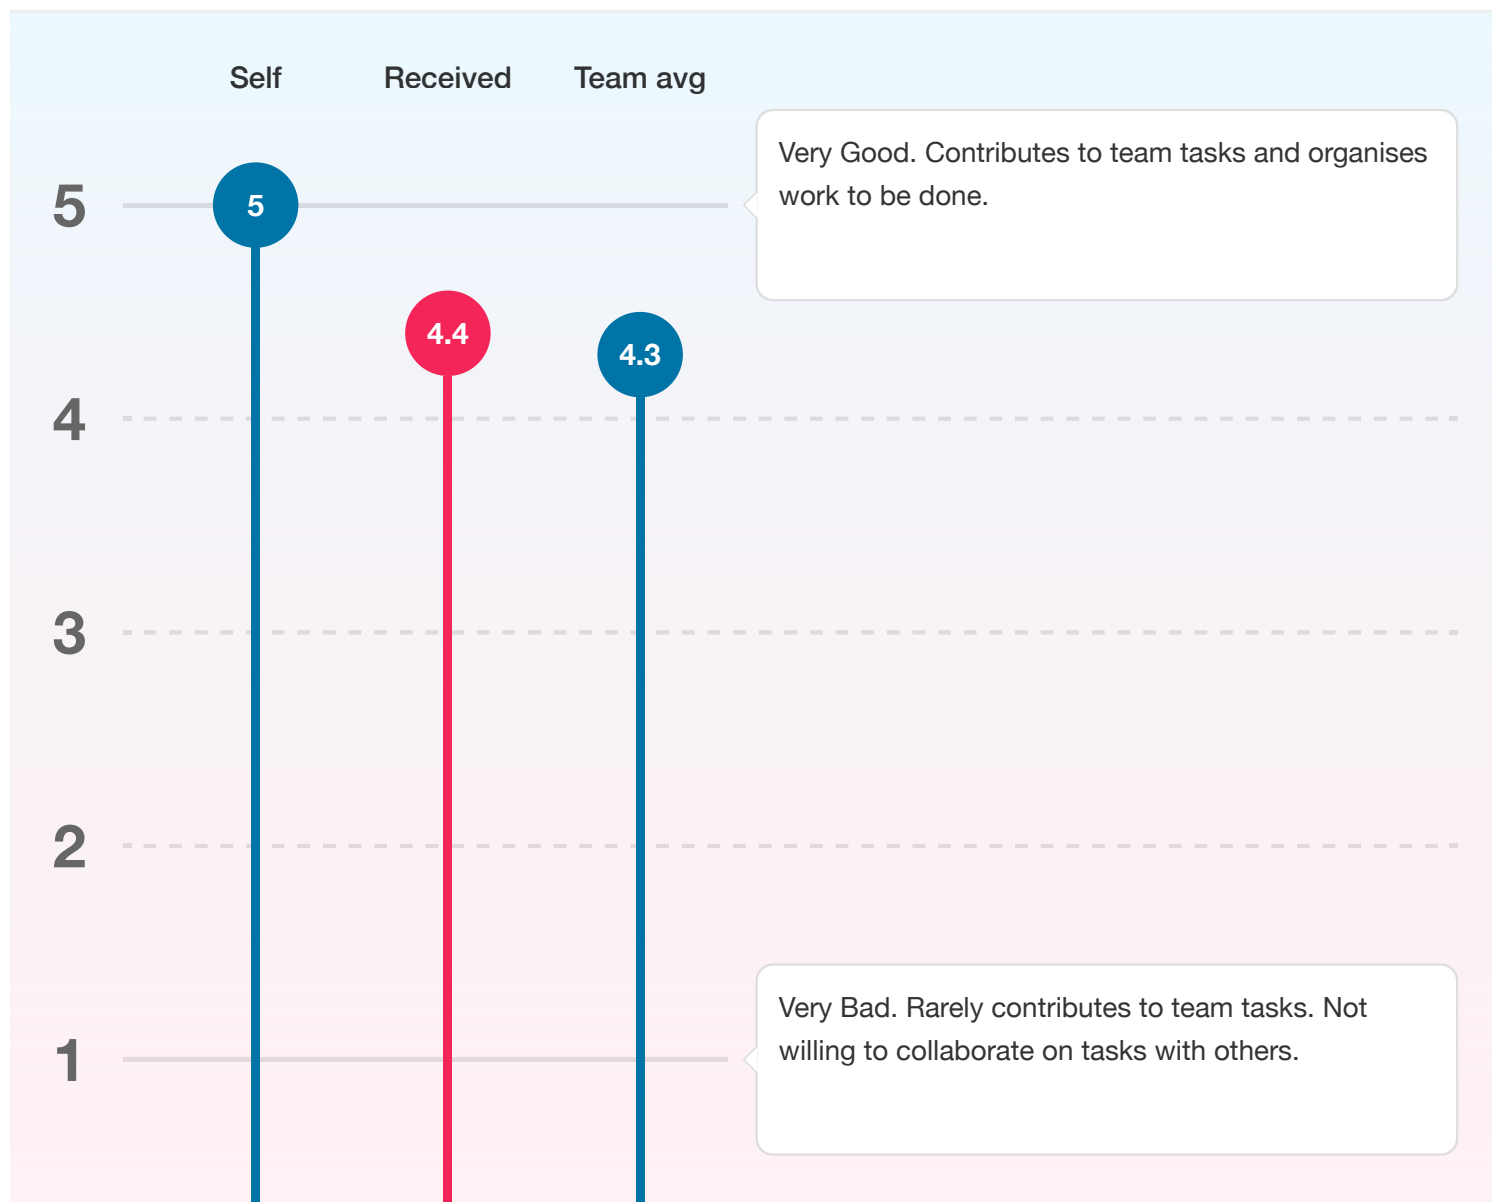

Research suggests the following behaviors will improve your ratings in this area:

You should consider the interactions that your team member has had with the rest of the team. These may have been in person or via channels such as email.

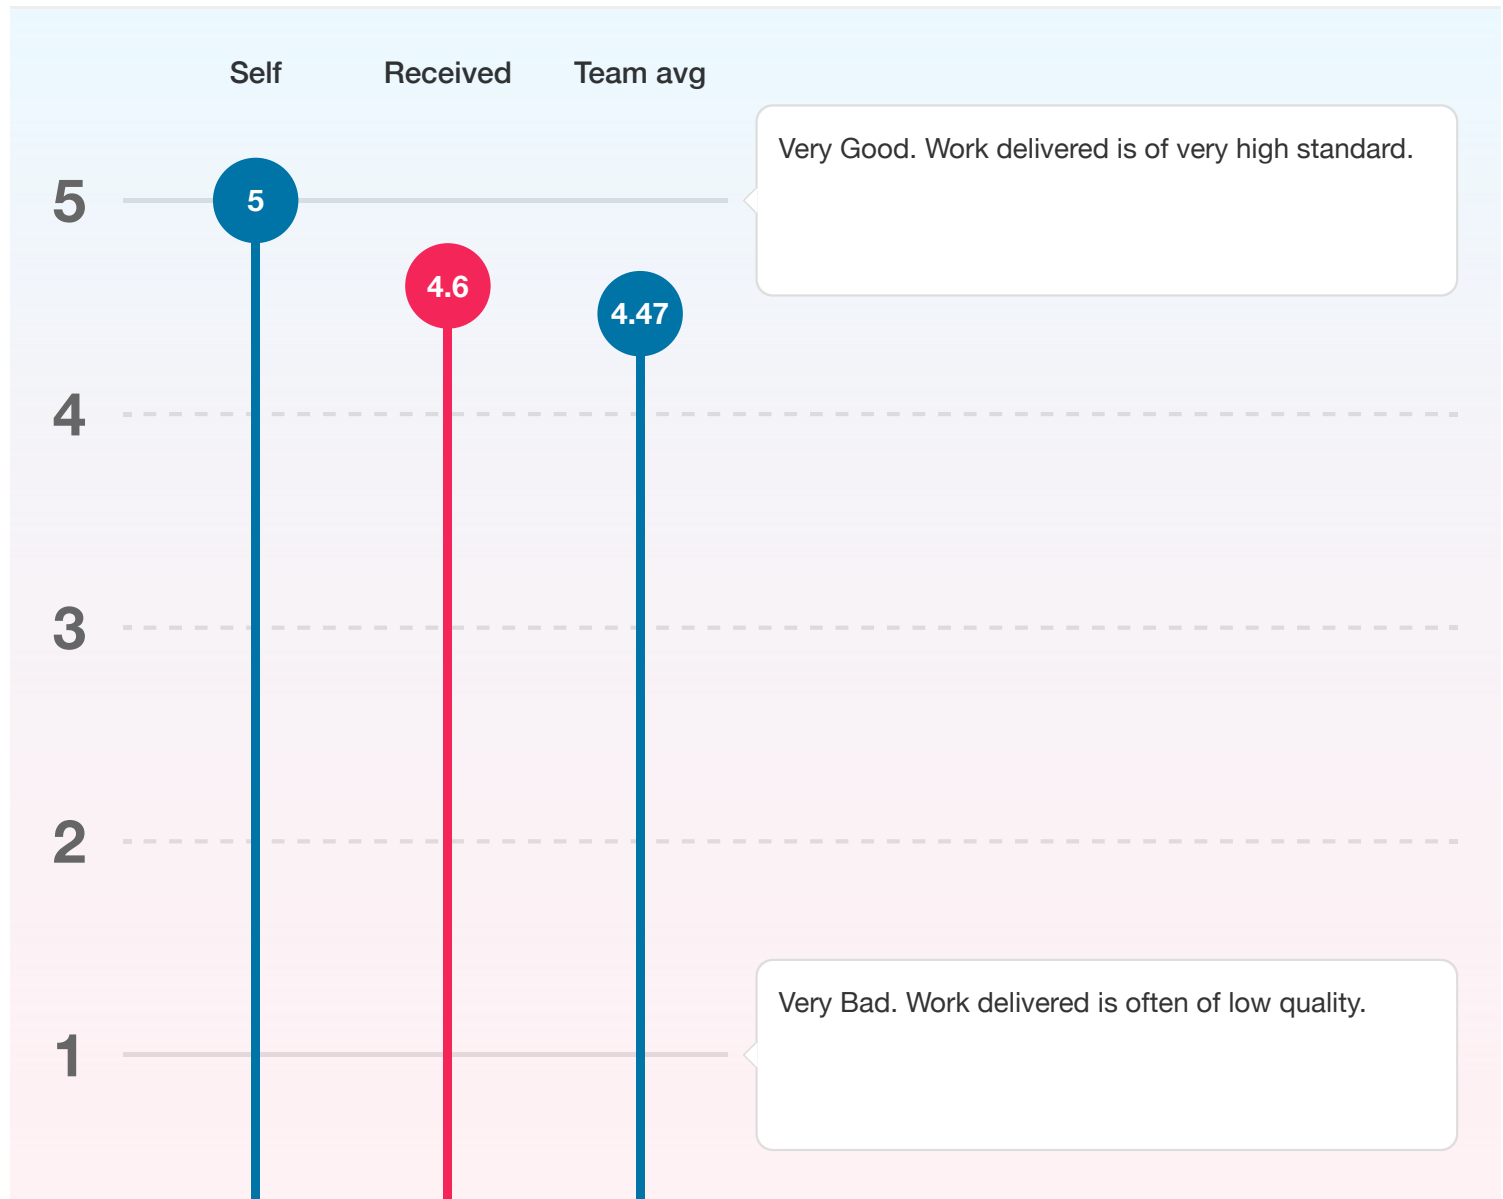

Contribution to content and organisation of project deliverables

You should consider the distribution and relative sizes of tasks related to your teamwork.
Has the team member contributed a balanced amount?

Quality of contributions

You should consider how useful the team member's contributions to your teamwork have been.

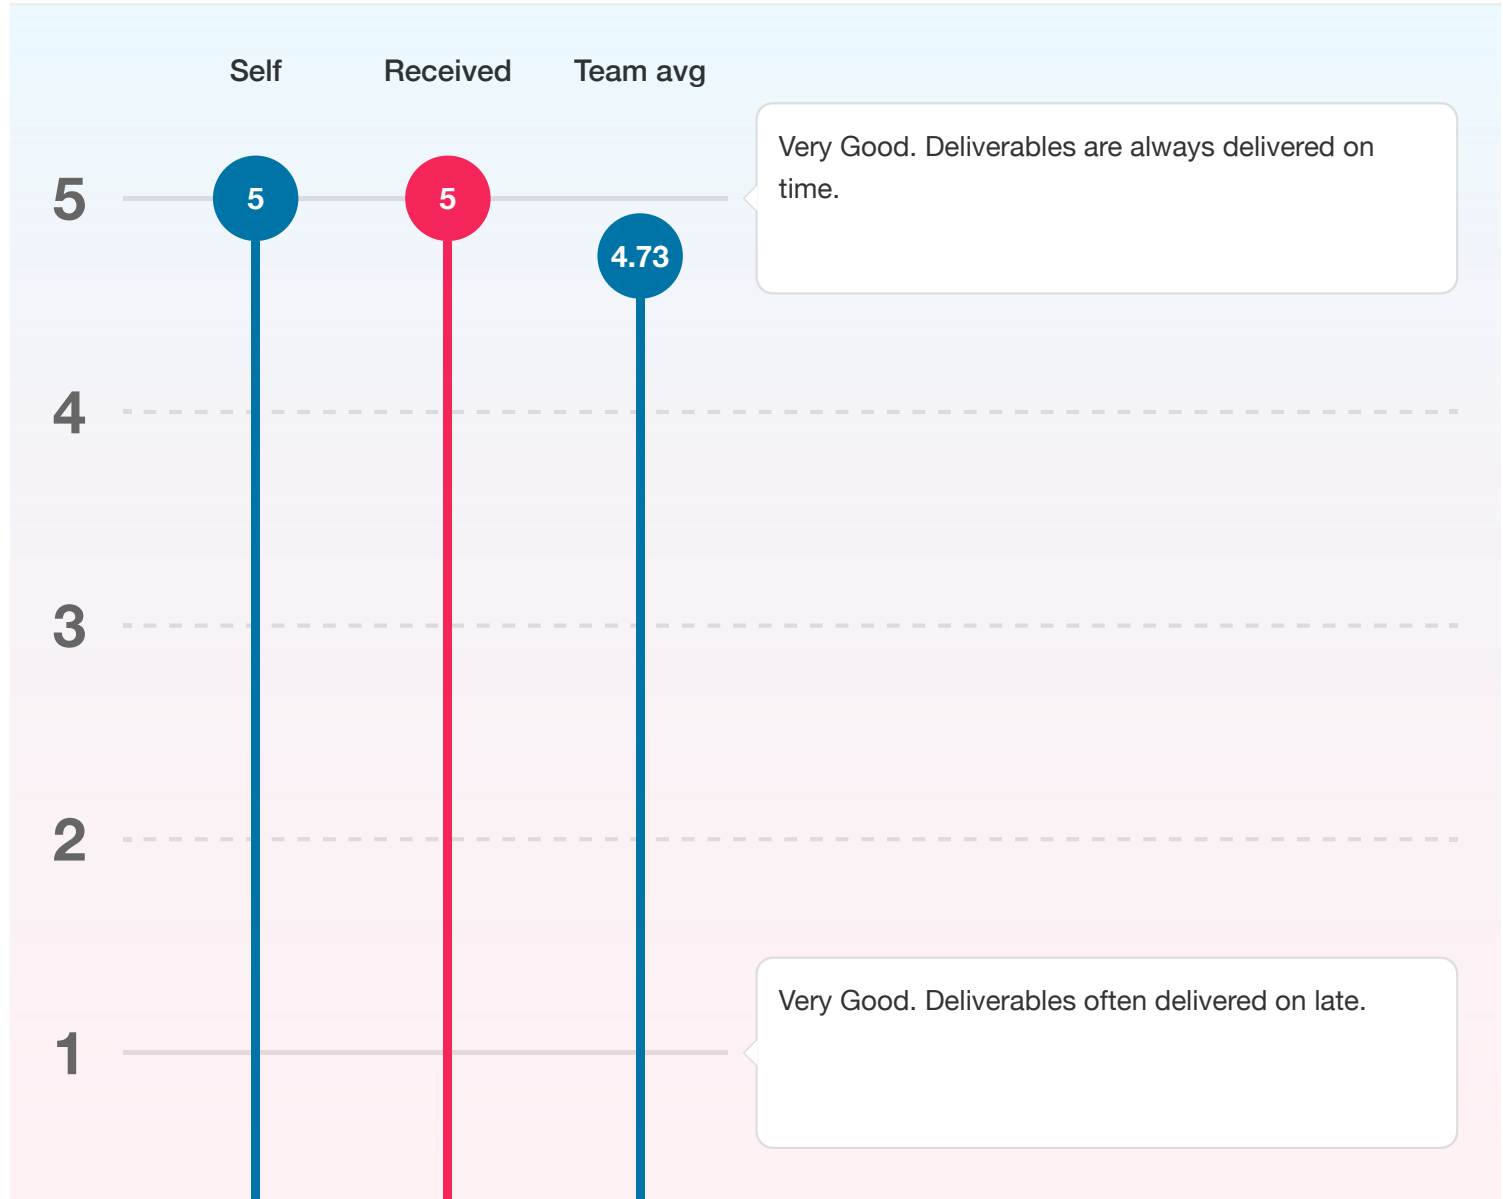

Research suggests the following behaviors will improve your ratings in this area:

You should consider how useful the team member's contributions to your teamwork have been.

Timeliness of contributions

You should consider how well the team member has met the deadlines agreed by the team.

Research suggests the following behaviors will improve your ratings in this area:

You should consider how well the team member has met the deadlines agreed by the team.

Peer messages

You have received these peer messages from group members:

Anonymous

Strengths

A good programmer, a good contributor, a good problem solver.

How to improve

Anonymous

Strengths

Good coding skills

How to improve

Hope to be more active in team meetings sometimes and not leave early.

Anonymous

Strengths

you will change the world.

How to improve

Learning some front end.
